

Sub E1
821
a computer;

a browser operating in the computer;

a sheet dispenser mechanism in operative connection with the computer, wherein the sheet dispenser mechanism is operative responsive to receipt of at least one HTML format document by the browser, to dispense at least one sheet from the ATM.

Remarks

Claim 31 has been added herein. Claims 1-31 are now pending.

The Specification has been amended to make explicit reference to Figures 16 and 19. No new matter is added as a consequence of these amendments.

A typographical error was noted in Figures 20-23 in that the reference to "SSL" should be "SSC" for "secure socket connection" as discussed on page 27, lines 27-28 of the Specification. An error was also noted in Figure 2 in that the journal printer was incorrectly labeled "44" instead of "48" as noted at page 10, line 1 of the Specification. Figure 2 is being amended to remove the reference to reference numerals 109 and 110 which are not discussed in the Specification. A Request to Amend Drawings and substitute drawing pages are being submitted herewith.

New claim 31 has been added herein. Claim 31 is within the scope of patentable subject matter acknowledged by the U.S. Patent Office in the Written Opinion issued in the corresponding PCT Application (PCT/US97/21422).

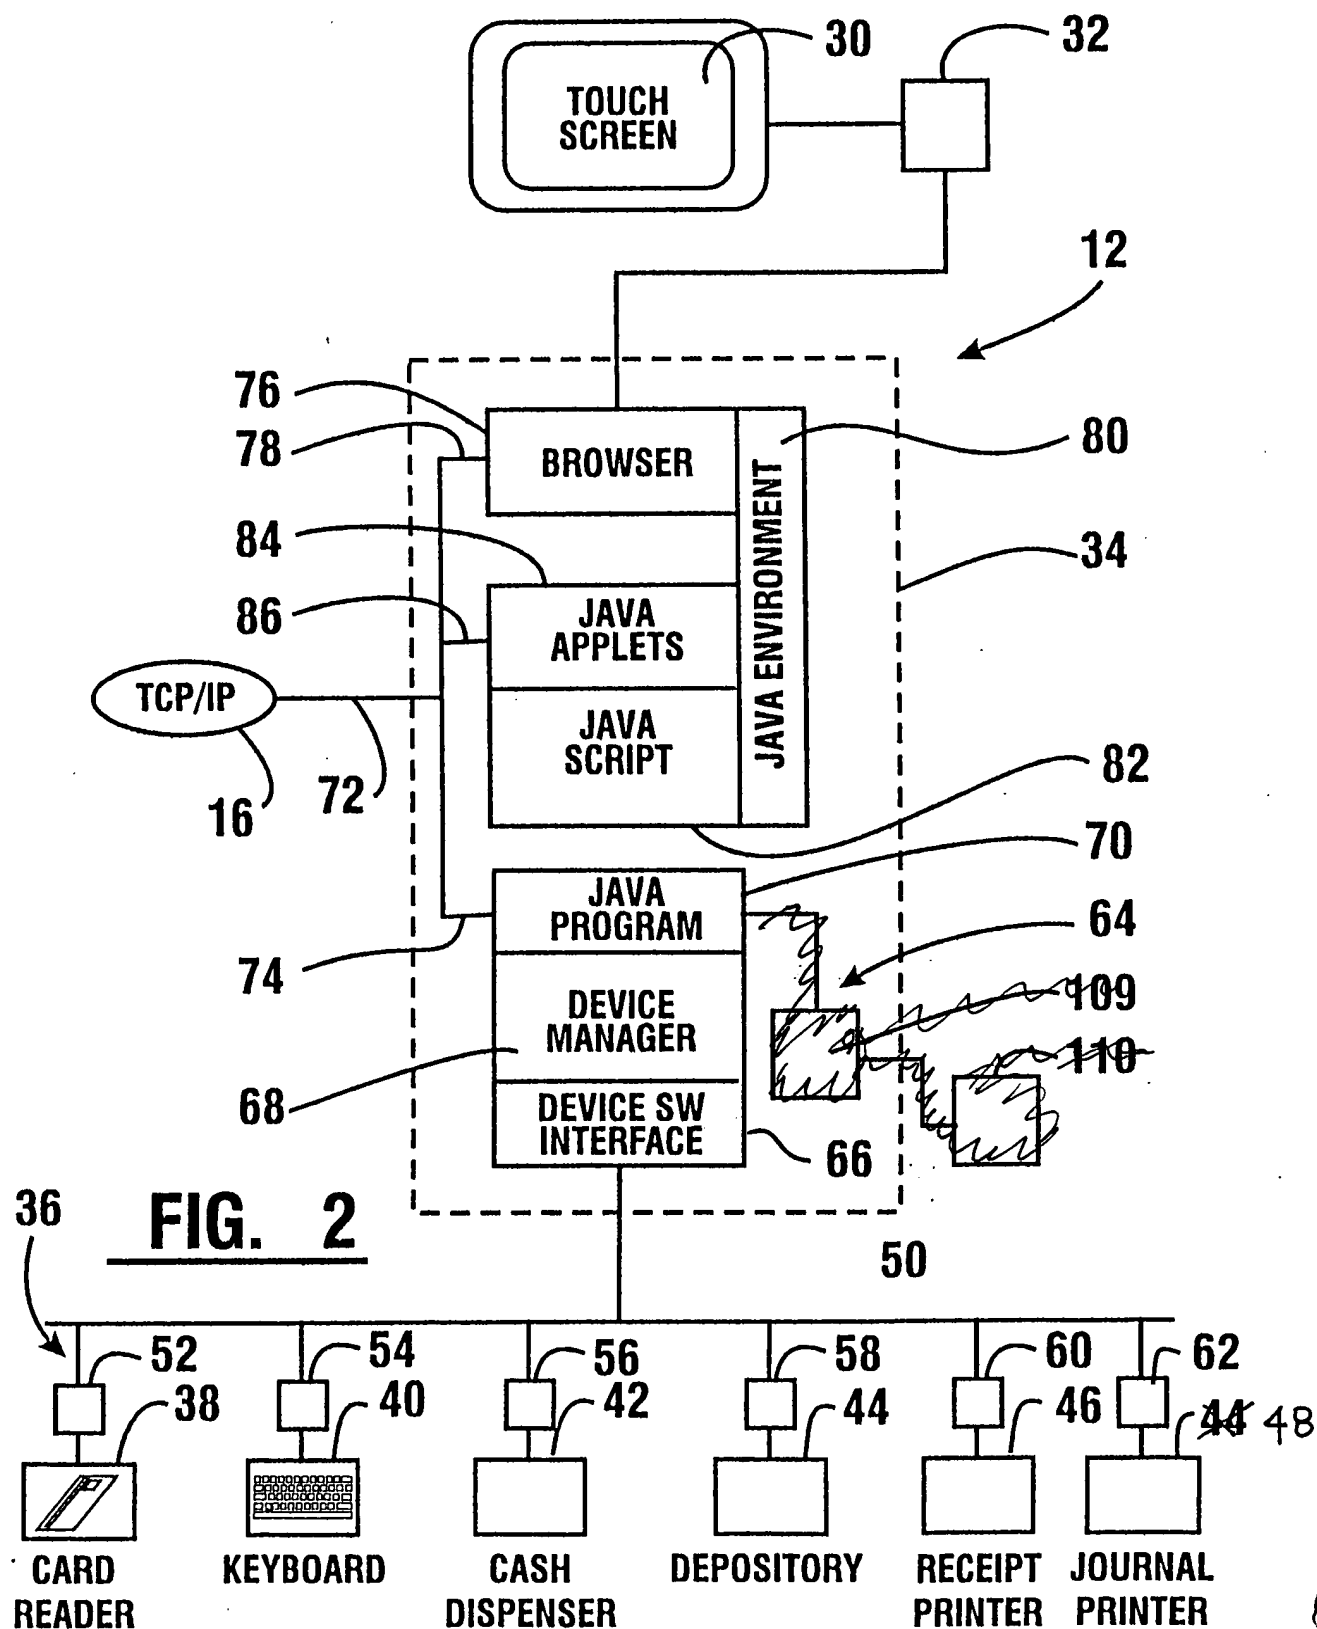

Please charge the fee for this additional total claim in excess of twenty (20) (\$18) and any other fee due, to Deposit Account No. 09-0428.

Favorable consideration of the Application is requested.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'R. Jocke', written over a horizontal line.
